

ARCHITECTURAL PORTFOLIO

FAHAD MAHFOTH

SELECTED WORKS &
DESIGN PHILOSOPHY

Hello There!

I am Eng. Fahad Mahfoth, an Architectural Engineering graduate from the University of Mosul – College of Engineering. I specialize in interior design for residential and commercial spaces, focusing on human-centered environments that connect with their context. I also work on selected exterior projects, especially heritage and context-sensitive architecture that respects the environment, history, culture, and community identity. My approach avoids repetitive, identity-less design and aims to create thoughtful, sustainable spaces with beauty and meaning.

Educations

2019-2023 University of Mosul
Bachelor of Architecture

2017- Present
Software engineering

Experiences

2017-Present
Senior Software Architect

2024– Present at MK Desgin
Interior Designer

Publication

Adaptive Residential Design for Urban Density in Tropical Climate

Architecture Student Conference
2020

2023 – Present (Freelance)
Architectural Designer

2019- Present
ERP Developer

Courses

2022 Sustainable Foundations for Construction in RESI project

2023 BIM Design with Revit
Learning Architect Design

Competitions

Documentation competition
Third place awarded by the Nottingham Community and the University of Mosul for documenting the Seven Doors Bazaar in Mosul

Langguage

Arabic
(Native)

English
Proficient

Innovation competition
Advanced Center for Sustainable Green House Design with LEED Standards from Tishik University in Erbil

TABLE OF CONTENT

01

Modern Villa
Modern Living

A modern luxury villa facade with bold geometric masses, dark frame elements, and warm vertical wood cladding.

02

Marriott Hotels
Hotel & Tradition

A contemporary hotel tower project in Mosul, combining elegant vertical massing with a refined hospitality identity.

03

Urban Design
Mosul – Doassa Street

An urban revitalization project for Al-Dawasa area, transforming an underused street into a pedestrian-friendly commercial and social corridor.

04

Twin-House
small House

PROJECT - 01

A modern luxury villa facade with bold geometric masses, dark frame elements, and warm vertical wood cladding.

01

Large glass openings, balcony glazing, and soft exterior lighting create an elegant contemporary appearance.

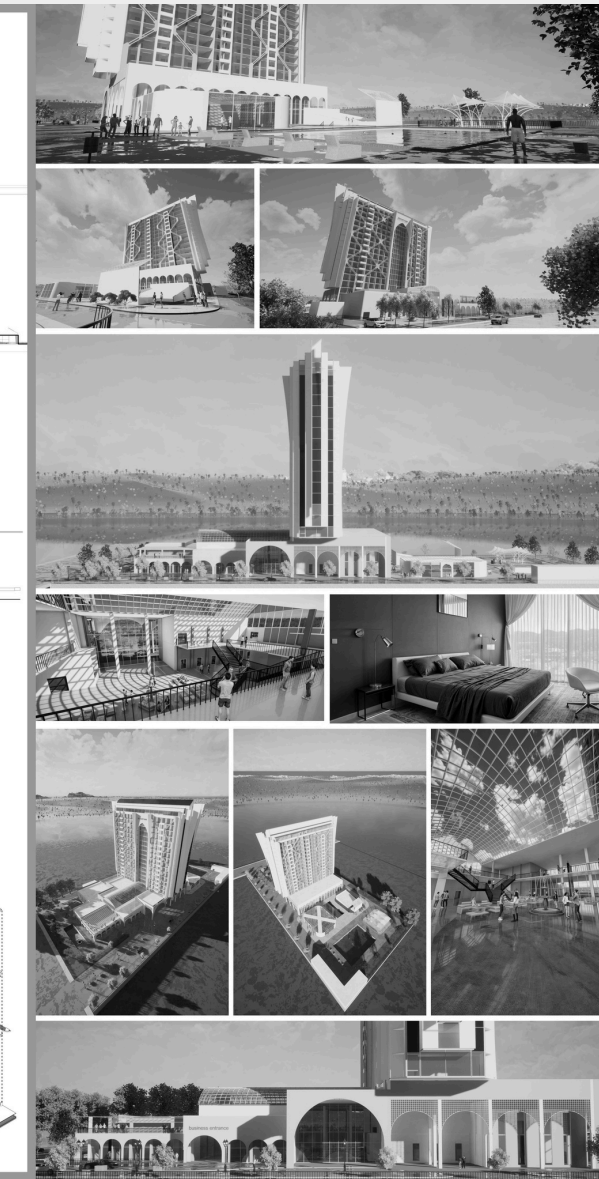

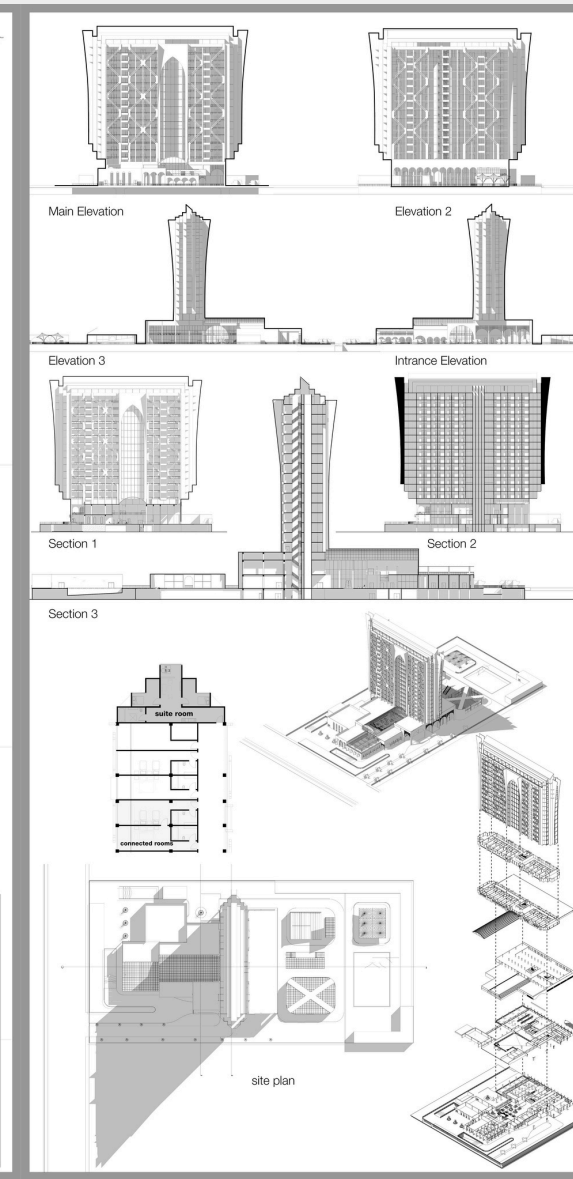

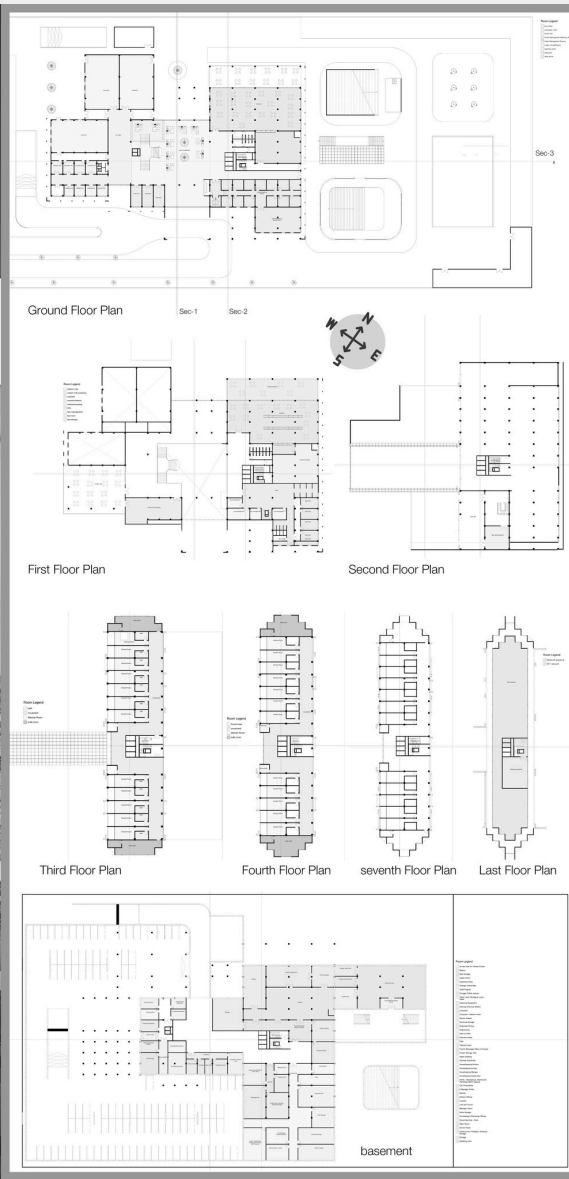

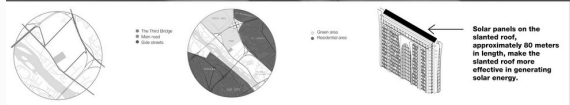

PLan floor

The design balances white walls, black metal details, greenery, and a horizontal gate for a clean upscale residential identity.

PROJECT - 02

The Concept

A contemporary hotel tower project in Mosul, combining elegant vertical massing with a refined hospitality identity. The design features arched entrance elements, solar-powered shading, detailed façade studies, and complete architectural drawings.

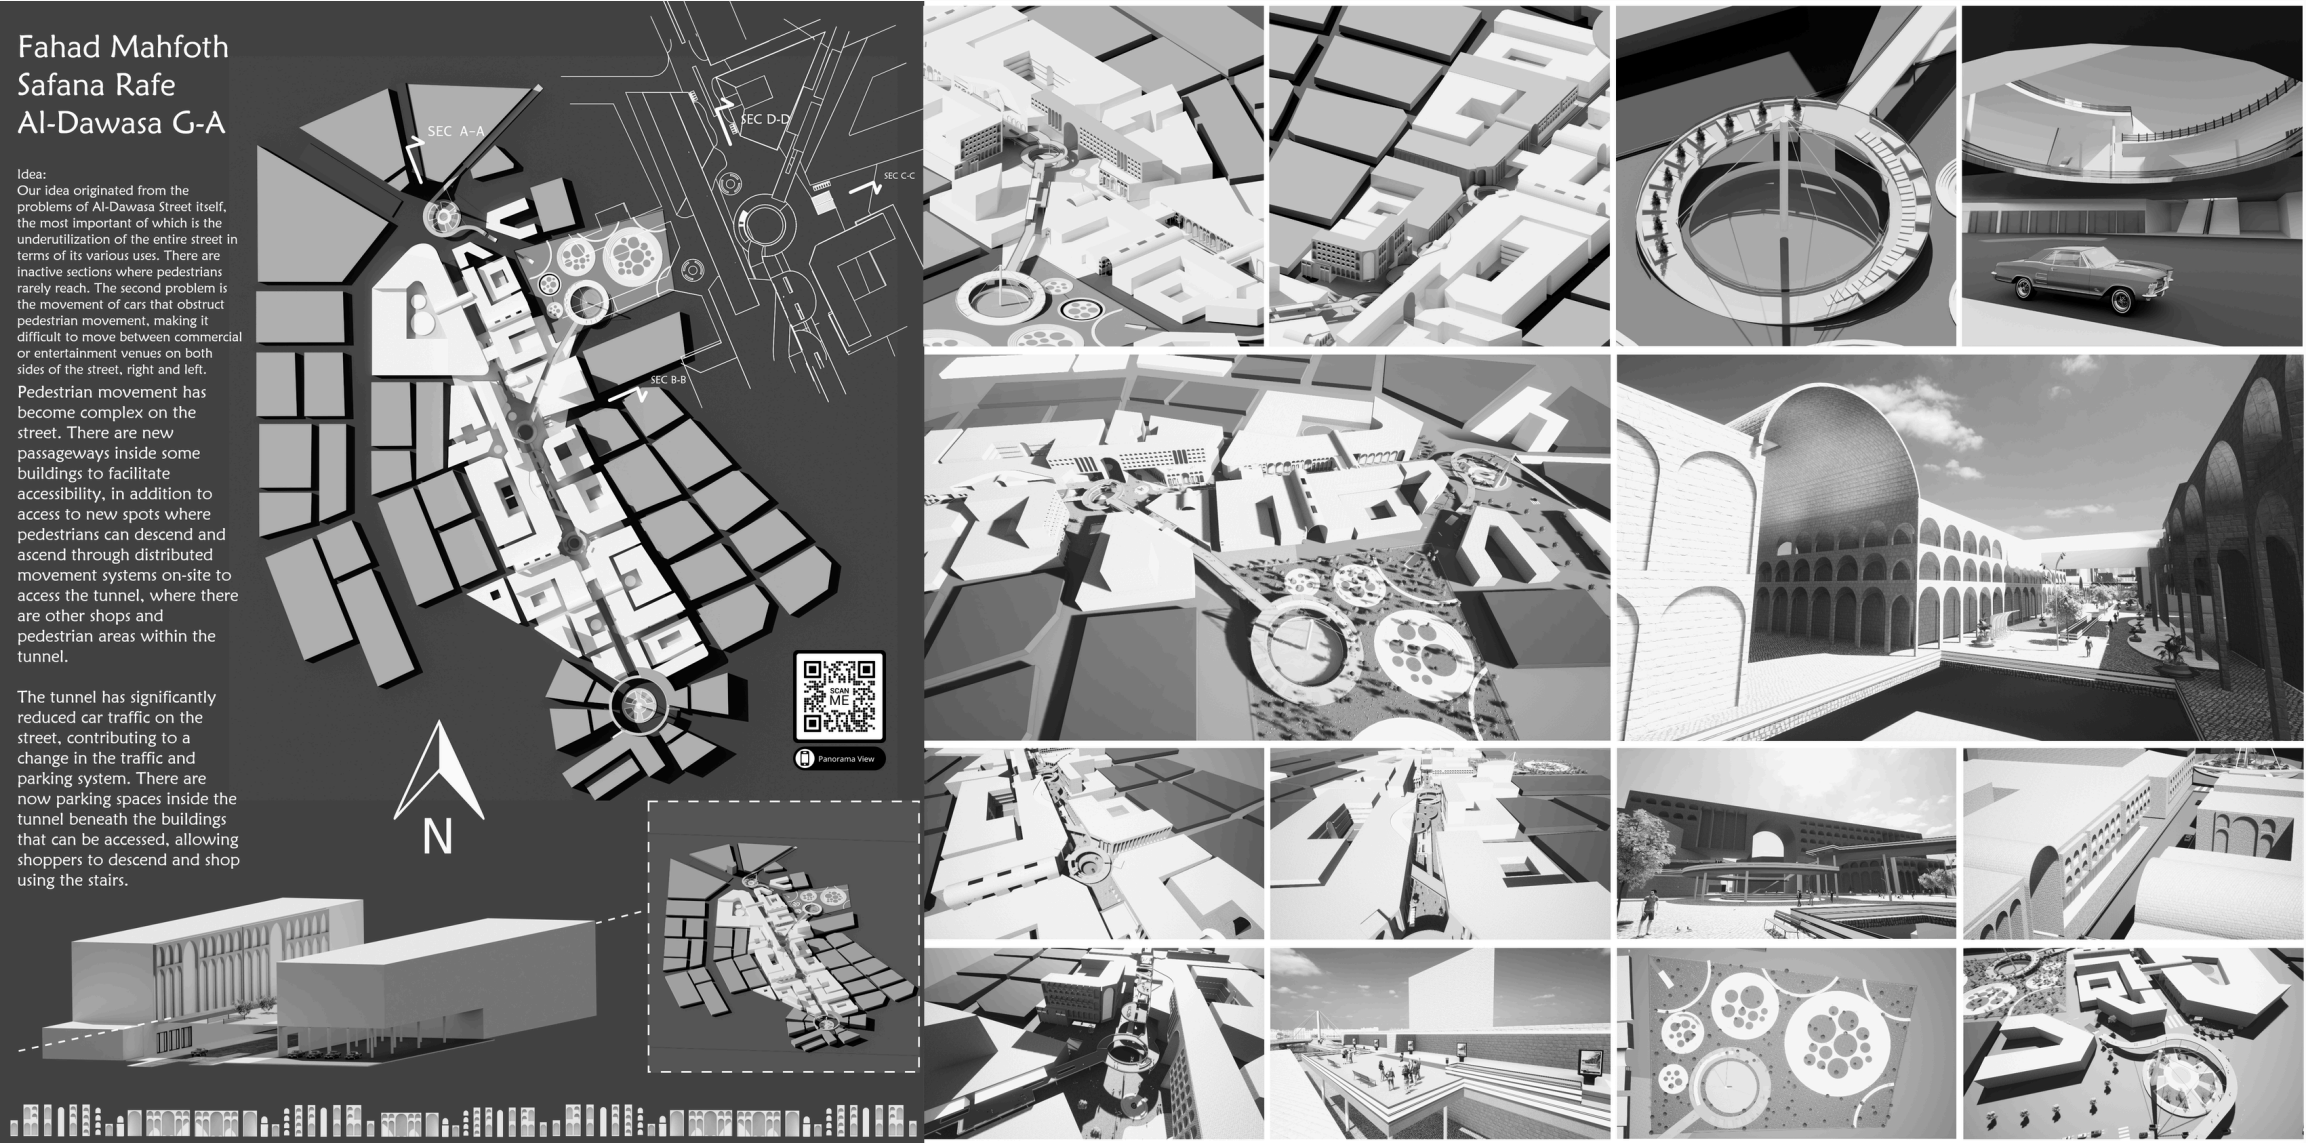

Rendered views, plans, sections, and interior scenes present a full hotel concept with strong urban presence and modern guest experience.

01

PROJECT - 03

Office Concept

An urban revitalization project for Al-Dawasa area, transforming an underused street into a pedestrian-friendly commercial and social corridor.

The design introduces elevated walkways, circular plazas, green spaces, water features, and shaded public nodes to improve movement and gathering. Traditional arch-inspired architecture and tunnel-based circulation create a stronger heritage identity while reducing car conflict on the street.
